This paper is not a degree certificate, but a certificate of completion of at least 100 credit units.

The degree of Master of Psychology comprises a minimum of 180 credits units.

Credit Unit denotes an average of 40 hours of work/week.

The degree requirements for oral and written skills in Swedish are those outlined in the Language Skills act for Public Servants (No. 148/22) regarding the language skills required of a public servant in a bilingual region of Finland.

The certificate will show only those minor subjects in which a whole course has been completed. Likewise, results for the second foreign language will only be shown if the requirements have been fully met.

In the estimation of the Faculty of Social Sciences, the above studies are equivalent to those comprising a Bachelor of Arts level degree.
